- #3 The Customs Office. This building was constructed of brick, was a single-story structure and had a hipped tile covered roof. It measured approximately 12 by eight m, and was located about four m distance from Point #2. Besides the customs office, the office of the Chief of Harbor Militia was probably located there.
- #4 Double Track Normal Gauge Rail Line. This track crossed Foint #1 at ground level. The railroad station, not shown on this sketch, was located west of the street of
- #5 The Harbor Master's Office. This building also contained the supply, finance and personnel sections of the Sovrom transport company. It was constructed, and had the same dimensions, as the building mentioned in Point #2, above. This building was located about two m from Point #3.
- #6 Fence. This fence was a wooden board fence about 1.5 m high. It probably surrounded the whole harbor area.
- #7 Street. This street was surfaced with granite stone, about four m wide, and was in good condition.
- #8 Park Area. It extended across the street of Point #1
 westward and northward to the outskirts of the town.
 The distance between the southern border of this park and
 the fence at Point #6, was approximately eight m. The
 about 200 m.
- #9 The SDGP Transport Company Office. The SDGP is a Soviet water transport company. The SDGP office building was constructed of cement-covered brick, was a single story structure, and had a gabled, tile-covered roof. It measured approximately 14 by six m. The distance between this building and the building at Point #5 was approximately 10 m.
- #10 Storage Building. This building served as a storage space for material (not freight) used by the SDGP. The building was of the same construction, appearance and size as the building mentioned in Point #9.
- #11 Rail Track. This was a single track normal gauge rail line spur, extending from the rail line. Point #4. in the harbor area.

The Sovrom Shipyard. This area extended about 40 m north - south and 200 m east. Construction and repair of Danube tugs and barges were undertaken at this shipyard.

24 hours a day and \$1,000 to h,000 people were employed there.

installation was a mussian (name unknown). There was a wooden board fence, approximately two to two and one half

wooden board fence, approximately two to two and one helf m high along the eastern side of the shipyard area. The gate, located in front of the building at Point #12A, was guarded by a shipyard guard, who possessed no visible weapons.

SECRET ~3-Building. This building was constructed of brick, and had #12A a sheet metal roof. The building extended about 10 m in a north - south direction. It probably contained offices.
West of this building a brick smokestack West of this building a brick smo extending at t 12 m above this structure. 25X1 25X1 25X1 Two Repair Barges. These two barges were tied at the quay near the shipyard. They were equipped with repair facilities for vessels (details unknown). #13 Frontier Troops Office Building. This building was constructed of cement-covered brick, was a single-story structure and had a sheet metal roof (gabled). It measured approximately eight by six m. Frontier troops guarded the harbor area. #15 Two Pontoons. The pontoons were of metal construction and had wooden decks. They served for embarkation and debarkation of personnel. Harbor Sanitary Service Building. This building was constructed the same as that building mentioned in Point #14. #16 The area between building Point #14 and #16, approximately six by six m, was cement surfaced and had a sheet metal roof. There were no walls on the northern and southern sides. The Quay. It was of granite stone construction, and about #17 eight m wide, extending about 100 m eastwards from the shippard's area, Point #12. The quay was approximately three m above water level (depth of the river along the quay unknown). #18 Storage Building. This building was constructed of cementcovered brick, was a single story structure and had a gabled, tile covered roof. It measured about 14 by six m. This building was used by Sovrom for storage of equipment, such as signal lights, cables, accumulators and distilled water. Storage building. This building was of the same construction as the building mentioned in Point #18 and was used #19 by Sovrom for the same purpose. The area between the street at Point #7 and the quay at Point #17 was surfaced with granite stone. One row of trees extended along the middle of this area in an east - west direction. The harbor area, located on the southern outskirts of Turnu-Severin, extended eastward and westward from the harbor center. There were no piers protruding from the quay into the stream. The basin was located about 25X1 500 m downstream from the shinward's area (Foint #12). 25X1 it could recommitate about 40 barges and tugs (hearsay information). Passenger boats
Rumanian Infantry 25X1 operated only downstream from Turnu-Severin. and Air Porce troops and Soviet ground forces personnel, but can give no details. 25X1 -end-Enclosure (A): sketch of Turnu-Severin [4438N-2240E] Harbor Area 25X1 25X1 SECRET
